

Whiskers' Whale Friend

Be sure to ask your parents for help when working on this!

Ingredients:

- ½ gallon plastic milk jug
- silver duct tape
- silver pipe cleaners
- googly eyes
- plastic water bottle cap
- construction paper
- silver fabric
- clear or silver beads or stones

Directions:

Step 1:

Get an adult to help you cut a large V shape into both sides of the bottom end of the jug, removing the bottom of the jug. This will be the whale mouth. Be sure to save the V shapes and the bottom of the jug to be the fins later!

Step 2:

Cover the entire jug with strips of the duct tape so that the entire jug is now the same grey as a whale. Ask an adult to cut small slits into the side of the jug.

Step 3:

Cover the previously cut out Vs in duct tape and silver fabric. Then insert the fins into the slits and ask an adult to use a dab of hot glue to keep them in place.

Step 4:

Use the base of the jug from earlier to cut out another v-shape. This one will be the tail. Cover the tail with silver fabric and insert the end into the jug opening (from which you pour).

Step 5:

Again, ask an adult to use the glue gun to secure the tail from the inside of the jug.

Step 6:

Grab the water bottle top and glue 4-5 silver pipe cleaners to the top. Curl the ends of the pipe cleaners for the spout of your whale and glue it to the top of its head.

Step 7:

Hot glue on the large googly eyes and your whale is ready for a cool dip in the Big Deep with Whiskers!
